CUSTOMIZE YOUR PRODUCT

CABLE LENGTH (between preamp and potentiometers)

10 cm

15 cm

IF YOU WANT A DIFFERENT LENGTH FOR EACH POTENTIOMETER,
PLEASE SPECIFY IT IN THE CUSTOM SECTION (last page).

REGARDING YOUR HIGH & LOW MEDIUM FREQUENCIES :

High MEDIUM

1,8 kHz

2,0 kHz

2,5 kHz

3,2 kHz

Low MEDIUM

250 Hz

300 Hz

500 Hz

800 Hz

This can still be modified on the electronic board, after installation.

RECOMMENDED FREQUENCIES BY VAUDOO-AUDIO:

- **300 Hz « ROUNDNESS »** : Strengthens the lower part of the spectrum, in addition to the bass. Very appreciated by the «green-yellow-red» musicians, but also by some rockers a little fat ...
- **800 Hz « FREQUENCY TO BE SHARED »** : A little drowned in the mix? Just increase this frequency (instead of doing the volume contest with the other musicians ...) and that's it, we distinguish you!

It didn't work out? It's because someone else is already squatting ... so decrease it and you can put some volume back into the rest of the spectrum (without enticing others to the contest ...).

- **2 kHz to 2.5 kHz « CLAQUANT »** : Brings out the percussive side, in addition to the «brilliant» of the treble. Much appreciated for the game in slap or mediator.

POSSIBLE CUSTOMIZATION : frequency selection switch. Specify it in the custom section (last page).
